# STARKY PAULINO

**DATA ANALYST / BI ANALYST**

New York, NY | starkyepaulino@gmail.com | GitHub: github.com/starkman9880

LinkedIn: linkedin.com/in/starky-paulino-6240a4169

## Professional Summary

Data and BI analyst with 20+ years of NYC commercial building operations experience. Builds Excel and Power BI reporting, Power Query transformations and DAX measures with a focus on data validation, reconciliation and clearly defined metrics.

## Technical Skills

BI and reporting: Power BI, DAX, Power Query, Power Pivot, dimensional modeling, Excel (PivotTables, lookups, charts)

Analysis: Data cleaning, reconciliation, validation, SQL (joins, CTEs, aggregations), Python (pandas, matplotlib); GitHub, BigQuery, Looker Studio (Google certificate coursework)

## Selected Analytics Projects

**Fire Alarm and Building Operations Analytics | Excel, Power Query, Power BI, DAX**
github.com/starkman9880/fire-alarm-building-operations-analytics

- Built a four-page Power BI report on system impairments, floor activity, recurring alarm-panel conditions, report coverage and documented durations; linked four tables to a shared date table to show recurring issues by floor.
- Separated directly observed alarm-panel conditions from unverified carry-forward entries; excluded unreliable durations from time measures. Created a synthetic public demonstration to protect operational source data.

**Hot Work Operations and Data Quality Dashboard | Excel, Power BI, DAX**
github.com/starkman9880/hot-work-operations-analytics

- Prepared 82 work-session records with stable identifiers, normalized contractor names and reconciliation statuses; built Overview and Data Quality report pages.
- Compared records against a 94-session log; flagged 13 log-only sessions and one database-only record for follow-up, and identified four initial end-time conflicts. Maintained a correction audit trail and excluded uncertain durations.

**Career Market Dashboard | Excel, Power Query, Power Pivot, DAX**
github.com/starkman9880/excel-career-market-dashboard

- Loaded 491,140 job records, 3,159,600 job-skill pairs and 1,422 skill-category mappings into an Excel Data Model; built skills-demand and advertised-pay PivotCharts with slicers.
- Showed SQL was requested in 62.7% of exact-NYC Data Analyst postings; documented U.S. versus NYC scopes, salary coverage and small-sample limitations. Tested slicer behavior and query refresh against expected counts.

## Professional Experience

**Allied Universal | Lead Fire Life Safety Director | New York, NY | Jan 2024 - Present**

- Built an Excel-based fire warden check-in system across 13 levels (cellar and floors 1-12) at a major technology client site, replacing paper sign-in sheets with coverage percentage, attendance and check-in count reporting and simplified warden and deputy roster updates.
- Monitor building fire-life-safety systems and document alarm, trouble, supervisory and impairment activity for shift handovers, engineering follow-up and operational reporting.
- Maintain inspection and permit records; communicate system conditions and outstanding issues to engineering teams and vendors for operational follow-up.

**EXCEL Security | Fire Life Safety Director | New York, NY | Sep 2005 - Jan 2024**

- Supported fire-life-safety operations, drills, inspections and incident documentation in commercial buildings; coordinated with tenants, vendors and property-management teams.
- Maintained life-safety documentation, inspection records and incident summaries to support management follow-up and compliance reviews.

## Education and Certifications

Herbert H. Lehman College, CUNY | Bachelor of Arts in Economics | Minor in French

Google Professional Certificates: Advanced Data Analytics | Business Intelligence | Project Management

FDNY F-89 Fire and Life Safety Director | Languages: English and Spanish (fluent); French (conversational)
